

OLYMPIAN™

Natural Gas Generator Sets

GROCERY

25-300 kW

I bring bushels of confidence to your produce aisle.

Picture the hustle and bustle of your store on a busy morning. Customers filling the aisles, cash registers ringing. Now imagine that you just lost power. Suddenly, you can't see a thing – and your customers and employees can't either. Picture the chaos and the many serious hazards that instantly occur. And, of course, the inventory that is quickly going bad with every passing second.

WHEN YOU LOSE POWER, YOU LOSE MONEY.

- Produce and frozen products will suffer quickly
- You risk the possibility of customer injury, looting, and other safety and security issues
- Precious time is lost handling the chaos and protecting your inventory
- Revenue generation comes to a halt until power can be restored

Dependable backup power from the Olympian™ natural gas generator set is the affordable, easy choice for backup power and can help prevent the debilitating consequences of sudden power loss.

THE POWER OF CAT® DEALER SUPPORT

The reliable power that Olympian generator sets produce is matched by the power that backs them. More than 200 Cat Dealer locations across North America are equipped with everything you need, from installing and configuring your generator set to maintaining peak performance for the life of the product. System selection assistance, equipment training, parts, service expertise and maintenance programs are available whenever and wherever you need them.

For more information, and to find a Cat Dealer near you, visit www.olympianpower.com/na.

KEEP YOUR FOOD FRESH AND YOUR CUSTOMERS SAFE.

With the backup power of an Olympian™ gas generator set, you ensure the continuous operation of your business, protect your valuable inventory and provide for the ongoing safety of your customers.

Olympian natural gas generator sets offer many advantages, including:

- **CONVENIENCE** – Just tap into the gas fuel line and you're ready to go
- **PERFORMANCE** – A reliable energy solution that delivers clean, economical power
- **APPEARANCE** – A clean, compact look with weather-protective and sound-attenuated enclosures
- **SELECTION** – Choose from a wide range of configurations rated from 25 to 300 kW (optional equipment also available)
- **SERVICE** – Each ready-to-run package comes with the comprehensive service and support of your Cat® Dealer
