

OLYMPIAN™ GENERATOR SET

EXTENDED SERVICE COVERAGE (ESC)

PROTECT YOUR INVESTMENT FROM UNFORESEEN REPAIR COSTS

- Choose ESC from your Cat Dealer anywhere around the world.
- Coverage available for new and used generator sets.
- Lower your risk of unexpected failure costs beyond standard warranty.
- Broad range of terms to meet your needs.
- Plan backed by Caterpillar.
- Protection against rising parts and labor costs.

PEACE OF MIND

PERFORMANCE YOU CAN TRUST

Caterpillar stands behind the quality of its products by offering ESC plans on Olympian™ generator sets up to 10 years from the original delivery date.

100% of usual and customary parts, labor and authorized travel & mileage expenses involved in the generator set repairs due to defect in materials and workmanship on covered components. Repairs performed by Cat® qualified technicians using Olympian genuine parts.

Simple, up-front, one-time payment representing a small percentage of your investment.

COVERAGE THAT IS RIGHT FOR YOU

Three levels of coverage are offered to best meet your specific needs:

Silver level covers a wide range of major components.

Gold level covers the same components as the Silver level as well as turbochargers, fuel nozzles & injectors, and water pumps.

Platinum level covers all original factory equipment with Cat part numbers, excluding consumables such as filters, hoses, belts, etc. This level is the only option for Prime applications.

COVERAGE AVAILABLE FOR THE LONG TERM

Your Cat Dealer can offer a multitude of coverage terms to best fit your application based on the number of hours you operate per year and the model of your equipment regardless if you are the first or last owners.

You can purchase ESC with your new generator sets as long as it is still within the standard warranty period. Coverage terms extend up to 5 or 10 year terms for prime and standby applications respectively.

Generator sets outside standard warranty period may qualify for Advantage ESC based on the successful completion of the Advantage ESC Certification Inspection performed by your local Cat Dealer. For standby applications, the completion of the Advantage ESC Certification Inspection is not required if your equipment is already enrolled in a Preventive Maintenance (PM) Program with your Cat Dealer or your existing ESC contract is expiring. However, to register the Advantage ESC your standby generator set must be enrolled in a PM program with the Cat Dealer. All Advantage ESC coverage terms are available from 12 to 60 months and can be renewed up to a maximum of 10 years from the delivery date with limitations on the total number of operating hours based on the model of your generator set.

Call your Cat Dealer or visit www.cat-electricpower.com today to learn more about how you can maintain your productivity.
